Wholesale Products
ACTS 2014

Product Notes

Each product selected for wholesale is hand made, unique, comes pre-packaged, is easy to mail, and can be custom designed to meet specific requirements.

Needle Felted Ornaments

Needle felted ornaments are constructed from assorted fibres and wool rovings, using hand and machine felting techniques. The technique can be used to create custom ornaments. Ornaments are typically 6 to 9 cm high.

Greeting Cards

Greeting Cards are printed from original pieces of fibre art. The Example below is from a 13.75" by 5.5" piece called Red Fishing Shed, Quidi Vidi. Cards come with envelopes and packaged in plastic sleeves.

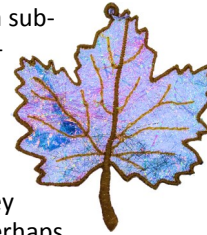

Wearable Art Pins

Wearable art pins are constructed on a substrate of fantasy fabric, which is formed from bonded fibres that are overstitched. Finished pins are mounted on recycled leather backs. Pins include a wide variety of shapes, and are typically 4 to 6 cm wide.

Shimmers

Shimmers are constructed on a substrate of colourful fibres, bonded into a translucent, often iridescent sheet. Images are machine embroidered onto the substrate. Shimmers are designed to be hung where they catch the light, in a window, perhaps, or on a tree.

Art Cards

Art Cards are constructed with a wide variety of fabrics, fibres and threads. Techniques include stitching, painting, dying, felting, and applique of decorative elements.
